Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action (paper 2/22/08).
3. Claims 11-15 are allowed.

Response to Arguments

4. Applicant's arguments filed 7/22/08 have been fully considered but they are not persuasive. The Terminal Disclaimer filed with your response is received and found proper. Rejections based on obvious type double patenting is withdrawn.
5. Applicants argue that the membrane has a high strength, advantages of having the smaller pores in the asymmetric structure at the inner side of the membrane, and the pore sizes; however, recognizes that the membrane in Oishi et al ('363) has a high strength and has microporous sizes (see current specification, page 11, third paragraph; arguments, page 5, first paragraph (recognizes high strength of prior art)). Applicant arguments about better performance when providing the skin or lower pore sizes at the inner surface are not persuasive, Arranging the skin at either surface is considered an obvious design choice, and the process of making the membrane asymmetric with outside or inside skin is disclosed in the prior art of record. Regarding to the membrane

performance, the skilled artisan for a membrane made from the same material and the same pore size surface and sponge structure and thickness, independently of where the skin is located is predicted to have the same performance, in this case the same protein or IgM separation/retention. Furthermore the membrane of the invention is a microfiltration with pore sizes of less than 10 microns as in Onishi (see column 4, lines 44-55).

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
